

Seamaster is proud to partner with Hexcyl Systems to distribute their innovative shellfish farming in South Australia and Tasmania.

Hexcyl Oyster baskets and Long Line Oyster Farming Systems are designed for the roughest, toughest environments in the world.

REVOLUTIONISING SHELLFISH FARMING

THE HEXCYL PRO 25 LITRE BASKETS & PRODUCTS

Hexcyl 25 litre baskets offer a durable and versatile product for farming oysters, scallops and other molluscs in the marine environment. Available in five different mesh sizes, Hexcyl baskets are designed to withstand rough conditions while promoting optimal stock growth and conditioning. Australian designed and made.

SOME OF THE UNIQUE FEATURES AND BENEFITS OF HEXCYL BASKETS AND LONG LINE FARMING INCLUDE:

Durability

Hexcyl systems are made of high-density polyethylene, which is strong and durable enough to withstand harsh weather conditions and rough waters.

Customizability

Hexcyl oyster baskets and long line farming systems can be customized to meet the specific needs of individual farmers, allowing them to optimize their shellfish growing operations.

Versatility

Hexcyl systems can be used in a wide range of environments, from low-energy to high-energy tidal areas, making them suitable for different types of shellfish farming.

Improved water flow

The unique design of Hexcyl baskets and farming systems allows for improved water flow and circulation, which can lead to better growth rates and higher yields.

Easy to use

Hexcyl systems are easy to install and maintain, which can save farmers time and money.

Eco -friendly

The use of Hexcyl systems can reduce the impact of shellfish farming on the environment, as they are made of recyclable materials and can be used for multiple growing cycles.

Overall, Hexcyl oyster baskets and long line farming systems offer a range of benefits that can help shellfish farmers to optimise their operations and achieve higher yields in a sustainable way.
