

PROTECTIVE CLOTHING

Working in harsh and unpredictable marine conditions, you need Personal Protective Equipment (PPE) that keeps you safe, while allowing freedom of movement to work and fish.

Aprons

Seamaster supplies aprons designed for a range of aquaculture and commercial uses, including cleaning the day's catch or general food preparation.

Gloves

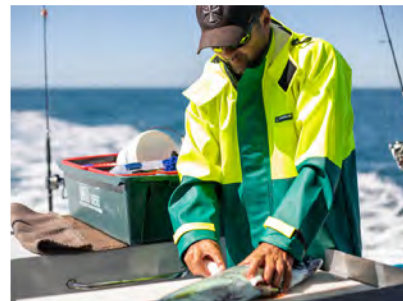

Our range of quality gloves are sourced to withstand rugged conditions, while allowing dexterity and providing essential protection against the elements for long working days.

Seamaster supplies gloves with a 'cut rating' of 5, the highest standard available.

Waders

We stock both neoprene and PVC waders to suit any application. Developed by oyster farmers, and made from premium materials, these waders will keep you dry and let you get on with the reason you're standing in a puddle in the first place.

Wet Weathers

Seamaster is a distributor of Stormline, Kiawaka and Horne's Aqua wet weather gear. We stock everything from heavy-duty material for heavy-duty work, through to super comfortable lightweight trousers and jackets in breathable, stretch fabric.

In addition where applicable, we recommend that you always wear an approved life jacket.
